

# Adrian Lona

Software Engineering Lead | Full Stack Architect | Engineering Manager

📍 Querétaro, Mexico    ✉ jadrianlf@gmail.com    ☎ 55 1594 0736    🔗 adrian-lona.maketastudio.com.mx

🌐 adrian-lona-726486a1

## Professional Summary

---

Strategic Software Engineering Leader and MBA graduate with 10+ years of experience delivering high-impact enterprise applications. Expert in driving technical strategy, scaling engineering teams, and bridging the gap between product vision and architectural execution. Proven track record in full-stack development (Node.js, React, AWS), stakeholder management, and establishing engineering excellence through mentorship, hiring, and performance management.

## Leadership Highlights

---

- **Engineering Leadership:** Successfully led and mentored cross-functional teams of 10+ engineers, improving delivery velocity and code quality through structured coaching.
- **AI-Driven Productivity:** Implemented AI-augmented development strategies (GitHub Copilot, Claude) to accelerate software delivery, technical documentation, and architectural decision-making.
- **Strategic Hiring & Growth:** Managed technical recruitment pipelines, conducted 20+ interviews at Kavak, and executed formal performance reviews to align talent with business goals.
- **Architectural Ownership:** Led the design and implementation of enterprise-grade systems, micro-frontends, and cloud-native architectures using AWS, Vercel, and CI/CD pipelines.
- **Product Partnership:** Collaborated directly with Product Managers and stakeholders to define technical roadmaps, project estimations, and sprint planning for multi-million dollar platforms.

## Core Competencies

---

**Management:** Engineering Leadership, Technical Hiring, Performance Reviews, Mentorship, Agile/Scrum, Stakeholder Management

**Strategy:** Technical Roadmaps, Project Estimation, System Design, Solution Architecture, Software Delivery Life Cycle (SDLC)

**AI & Productivity:** AI-Augmented Development, Agentic Workflows, Prompt Engineering, GitHub Copilot, Claude, OpenAI, Engineering Acceleration

**Execution:** Full Stack Engineering, Enterprise Design Systems, CI/CD, Cloud Strategy, API Design, Scalability & Reliability

## Professional Experience

---

### **Software Engineering Lead**, MSC Industrial Supply – Remote

Jan 2024 – present

Directly leading architectural decisions and engineering standards for a multi-billion dollar enterprise distributor.

- Directed a team of 10 engineers in the delivery of enterprise-scale applications, overseeing project estimation and sprint execution to ensure on-time delivery of business-critical features.
- Architected a full-stack modernization strategy using Node.js, Express.js, and Prisma ORM with PostgreSQL, improving data consistency and system performance by 30%.
- Owned the Enterprise Design System implementation using Stencil JS and React, reducing frontend development time by 40% across multiple business units.
- Established CI/CD best practices using GitHub Actions and Vercel, automating deployment strategies and significantly reducing production incident rates.
- Partnered with Product Management to translate business requirements into technical specifications, ensuring architectural alignment with long-term scalability goals.

### **Frontend Tech Lead**, Midas Technologies

Jan 2023 – Dec 2023

- Defined the UX/UI architecture for crypto-founding and gaming platforms, delivering scalable React and React Native solutions for mobile and desktop.
- Partnered with executive leadership to define product roadmaps and technical feasibility for early-stage fintech projects.

### **Software Engineering Specialist**, Cemex – Monterrey, Mexico

Jan 2023 – Dec 2024

Modernizing the digital core of a global building materials leader.

- Led the modernization of the Cemex Go platform, transitioning legacy modules to a resilient Angular architecture with enterprise-grade Web Components.
- Optimized enterprise web accessibility and performance standards, ensuring compliance with global UX guidelines for thousands of B2B customers.
- Orchestrated cross-functional knowledge transfer programs on Stencil.js and Strapi, elevating the technical proficiency of the regional engineering team.

### **Technical Lead**, Kavak.com – Mexico City, Mexico

Jan 2019 – Dec 2022

Scalability and engineering culture leader for Latin America's first unicorn.

- Spearheaded technical recruitment for the engineering org, conducting 20+ interviews and facilitating formal performance reviews and weekly 1-on-1 coaching sessions.
- Architected a high-traffic internationalization (I18N) framework and Strapi CMS integration, enabling rapid market expansion across Brazil, Chile, and Argentina.
- Led a strategic monorepo migration for the core platform, improving developer experience (DX) and reducing build times for 50+ contributors.
- Defined frontend engineering standards and governed the Storybook-based Design System, ensuring 100% UI consistency across the web ecosystem.

### **UX Engineer**, Teknei

Jan 2018 – Dec 2019

- Developed high-performance corporate interfaces using Java Spring MVC and modern JavaScript frameworks, aligning technical execution with business strategy.

## Web Design Lead, Web Maps

Jan 2016 – Dec 2017

- Managed a creative engineering team, supervising design interns and coordinating SEO/marketing engineering initiatives to drive user growth.

## Education

---

Universidad Tecnológica de México, MBA in Business Administration

Jan 2020 – Jan 2022

Universidad Tecnológica de México, BA in Graphic Design

Jan 2007 – Jan 2011

## Languages

---

**English:** Advanced / Professional

**Spanish:** Native

**Japanese:** Beginner

## Technical Skills

---

**Engineering Leadership:** Hiring, Mentoring, Performance Reviews, 1-on-1s, Agile/Scrum, Sprint Planning, OKRs

**Architecture:** System Design, Microservices, Micro-frontends, API Design (REST/GraphQL), Solution Architecture

**Backend:** Node.js, Express.js, Prisma ORM, PostgreSQL

**Frontend:** React, Angular, Next.js, TypeScript, Stencil JS, Web Components, Storybook, Design Systems

**Cloud & DevOps:** AWS, Vercel, CI/CD (GitHub Actions), Docker, Git, Security Best Practices

**Product & UX:** Product Strategy, Stakeholder Management, Web Accessibility, Figma, UX Strategy

## Ai Engineering and Developer Productivity

---

- **AI-Augmented Development:** Pioneered the integration of AI coding assistants (GitHub Copilot, Claude, OpenAI) into the engineering workflow to multiply developer output and streamline complex debugging.
- **Agentic Workflows:** Designed and deployed agentic patterns for automated code analysis and documentation, reducing manual technical writing overhead and improving knowledge sharing.
- **Prompt Engineering for Engineering:** Developed standardized technical prompt libraries to accelerate system design, unit test generation, and legacy code refactoring.
- **AI-Assisted Architecture:** Leveraged AI tools to conduct rapid-prototype architectural reviews and impact analysis, facilitating faster and more data-driven technical decision-making.
- **Productivity Benchmarking:** Evaluated and optimized the impact of AI tools on the Software Delivery Life Cycle (SDLC), targeting bottlenecks in the PR review process and CI/CD pipelines.
